

Gateway UPGRADE NORTH

Date: 1 February 2016
Ref no: CN0008

Construction notification

Additional night work investigations of existing ground conditions – Bracken Ridge to Bald Hills

To prepare for major construction on the Gateway Upgrade North project, investigations need to be undertaken to determine the existing ground conditions at various locations along the Gateway Motorway between Bracken Ridge and Bald Hills (refer to the map overleaf).

Due to the nature of these construction activities, works are required to be completed at night, when traffic volumes on the Gateway Motorway are lower, to ensure the safety of motorists and workers.

Night works will be undertaken **from Sunday 7 February 2016** and are expected to take **approximately 10 nights to complete**. Night works will only be carried out from Sunday to Thursday.

Activities will include:

- using heavy machinery and hand-held tools to dig through the existing road surface on the Gateway Motorway in several locations, up to a depth of 1-2 metres
- removing ground materials at each sampling location for testing
- backfilling and restoring the road surface at each sampling location.

What to expect:

- Lane closures, reduced speed limits, and police/traffic control will be in place on the Gateway Motorway during these night works.
- Use of machinery including an excavator, bobcat, trucks and hand-held tools.
- An increase in construction traffic accessing the work sites.
- Flashing lights and reversing beepers from machinery and vehicles.
- An increase in noise may be experienced at surrounding properties during these night works.

Every effort will be made to minimise construction impacts on the local community. We thank you for your patience and understanding during these important works.

Please note, the timing of all activities is subject to weather and construction conditions. Should activities be delayed by weather, they will be rescheduled for the next available work shift.

If you would like any further information about these activities, please contact the project team on **1800 607 755** or at **contactus@gatewayupgradenorth.com.au**.
