

# Gateway UPGRADE NORTH

Date: 1 February 2016  
Ref no: CN0011b

## Update – Construction notification Night work investigations of existing ground conditions – Sandgate Road bridges

To prepare for major construction on the Gateway Upgrade North project, investigations need to be undertaken to determine the existing ground conditions at the Sandgate Road bridges.

Due to the nature of these construction activities, works are required to be completed at night, when traffic volumes on the motorway are lower, to ensure the safety of motorists and workers.

Additional investigations are required in the vicinity of the Sandgate Road bridges (refer to the map overleaf). These night works will be undertaken **between 7.00pm and 5.00am** and will continue until **late February 2016**. Night works will only be carried out from Sunday to Thursday.

### Activities will include:

- using a mobile drill rig to drill through the existing road surface on the Gateway Motorway up to a depth of between 10 and 30 metres
- removing sample ground materials at each of the drilling locations for testing
- using an air vacuum excavation truck to locate underground services, including gas, water, sewer and telecommunications.

### During these works the surrounding community can expect:

- lane closures, reduced speed limits, police and traffic control will be in place on the Gateway Motorway during night work
- use of heavy machinery, including a mobile drill rig and air vacuum excavation trucks
- an increase in construction traffic accessing the worksites
- flashing lights and reversing beepers from machinery and vehicles
- an increase in noise may be experienced at surrounding properties during these night works.

Every effort will be made to minimise construction impacts on the local community. We thank you for your patience and understanding during these important works.

Please note, the timing of all activities is subject to weather and construction conditions. Should activities be delayed by weather, they will be rescheduled for the next available work shift.

If you would like any further information about these activities, please contact the project team on **1800 607 755** or at **contactus@gatewayupgradenorth.com.au**.
